Digital Marketing Manager – Agency

Description

You're a Marketing manager and you're looking for change? Well look over here, a fab business: very successful with a savvy, friendly team who go the extra mile for each other and their clients.

Work with the senior team and directors, who are all over digital marketing, it's their thing, actually it's their business as a digital marketing agency. You'd be their very own marketing manager, writing great content to share on social (some great case studies so no probs there) as well as taking control of their lead generation activities (paid, inbound marketing).

They are a thorough, organised bunch and you'll need to be too, e.g. measuring the results of your data driven campaigns and building sales/ marketing funnels.

I've known this business for a while, they're a mature, sophisticated business full of folk with inquisitive minds who get things done. This is going to suit you if you've worked in digital marketing for a technology/software business or eCommerce or indeed a marketing agency.

Salary is dependent on your experience. Give me a shout if you're curious.
