Senior PHP Developer

Description

3 month contract opportunity for a senior PHP API developer. Digital development consultancy in Gloucestershire. Outside IR35.Need a great communicator for direct client contact from time to time.

Experience:

- 1. Many years' experience so you're sh*t hot
- 2. Codeignitor
- 3. MySQL Commands and db skills
- 4. REST Api
- 5. Git source control
- 6. Dev Ops (not crucial but would help)
- 7. Linux CLI
- 8. Composer package Manager

Part of a team, but you'll work on your own troubleshooting and communicating with client and tech lead / CEO. A US client will need support so you'll need to be flexible with working hours – call me for clarification.

If you can help with system architecting as well, that would be a bonus.

START 4th Jan , 3 months – likely extensions
