Full Stack Developer

Description

Web Developer – remote – South west

Great opportunity to join a funky digital business in the leisure sector. Everyone else is contracting in the sector but these guys are growing. A real success story in the Southwest, they are looking for a senior web developer to join the team. This role is remote but office available for those preferring a teamwork environment.

Join an organisation that looks after its people. loads of resources and training available.

Working within the development team on new features and improving productivity across our platforms, utilizing both front-end skills (jQuery & Rest API), and back-end skills (PHP, MySQL, and legacy asp classic). Experience with Linux, server maintenance, security procedures, and database optimisation would be highly beneficial.
